INTO THE FUTURE: For the first time in history a major power boat manufacturer has put a “Boat of The Future” into full production.

Solar Star International, in partnership with Kachina Boats, a 45 year builder of custom power boats in Phoenix, AZ, is now producing a 21’ solar powered boat.

The object of the Solar Star is to reach into the future using 100% SOLAR POWER. The Solar Star 21’ was designed by TC Designs of New Zealand, an innovator of solar powered marine applications. This new boat is being tooled and assembled by Kachina Boats in the USA.

Orders are already coming in from all over the world! Solar Star International is awaiting its very tedious selection of dealers and distributors world wide including the immediate marketing and sales during all major US boat shows in early 2009.

The success is apparent for Solar Star 21’ as well as many other models already in the final design stages!

- ✓ Environmentally sensitive
- ✓ Affordability
- ✓ Technologically Advanced
- ✓ Endless Possibilities

THE FUTURE IS NOW!

Kachina Boats is an innovator of stylish designs ranging from early 18 1/2’ models up to 39’ power boats and is a noted leader in custom “One of a Kind” power boats.
